

NovaForge Security Notice

All employees and contractors are required to use **ONLY** the company-approved **Opera browser** for accessing internal resources.

This policy is especially critical when logging into the internal administration portal:

STORAGE.novaforge.local
<http://127.0.0.1:5000/login.aspx>

The use of any other browser (such as Chrome, Edge, Firefox, or others) is **strictly prohibited** for this purpose.

Security Requirements

This requirement is enforced to ensure:

- Consistent security configurations
- Protection against browser-based attacks
- Controlled handling of authentication sessions
- Compliance with internal security policies

Credential Handling Notice

Please be aware that while the Opera browser implements encryption mechanisms to protect sensitive data (such as credentials, cookies, and tokens), **no storage mechanism is 100% secure.**

Certain data may still be accessible under specific conditions (e.g., local compromise, malware, or privilege escalation).

 **For this reason, users are strictly advised:**

- **Do NOT store credentials in the browser**
- **Do NOT use autofill for sensitive data**
- **Always enter credentials manually when accessing internal systems**

Important Notice

Failure to comply with this policy may result in:

- Restricted access to internal systems
- Security violations being reported
- Disciplinary action

Support

If you do not have the approved Opera browser installed, please contact the **IT Department** immediately.
